[All Tables.pdf](#)
[Phase 1 Analytical Results Report.pdf](#)

Ayn,

I've found an excel version of our Phase 2 tables. I've also attached a pdf version of the final tables included in the Phase 2 ARR report.

Table 12 and Table 13 of the excel document contain the SVOCs and VOCs for phase 2, respectively.

As we discussed, Luke and I don't believe that there is a similar table for the phase 1 analysis (at least in excel format that we have) since there weren't many detections, only TICs. I have attached the Phase 1 ARR report in pdf format, which does have two or three tables of organic detections. The scope of data is small enough that we could probably look at the pdf to determine if they are above screening levels.

Let me know if you need anything else.

Rob

Greg thought one of you might have a spreadsheet for Phases 1 and II that contains both the CLP and the R8 lab data. True? If so and we think it is relatively error-free, it would be incredibly

useful. Let us know...
